

CABHI Evaluation Report Client Data Summary

Keys Points

- ▶ A total of 117 clients completed GPRA intakes in 2014, nearly meeting the 120 annual goal for the program overall despite not being in operation the full year.
- ▶ The data for FY 2015 year to date as of February 19, 2015, showed 51 intakes, on target to meet the 2015 goals as well. (Table 1)
- ▶ Demographic characteristics of the 2014 client population show:
 - 52.1% were white followed by African-American (12%)
 - 10.3% were Hispanic/Latino
 - 53% were male and 47% were female
 - 3 Veterans were served
 - 37.6% were aged 45-54 plus 22.2% 55-64
- ▶ The demographics of the client population for both 2014 and 2015 were compared to the Disparity Statement goals and to two Nevada point-in-time homeless censuses. A comparison of these numbers with client demographics suggest a review of goals may be appropriate now that this information is available. (Table 2).
- ▶ 47% of the clients had children; 63.7% of those with children had either one or two. A total of 121 accompanied children thus were helped via the client who entered the program. (Table 3)
- ▶ 49.6% of the 2014 clients were living on the street at intake and 29.9% were living in a shelter. (Table 4)
- ▶ Strong Gains in Outcomes Reported
 - ✓ At intake, only 2.6% had permanent housing at intake but by the time of their six month follow-up interview, 66.7% of those with follow up information had permanent housing. (Table 6)
 - ✓ Employment and educational status also showed a strong increase from 5.1% at intake to 28.2% six months later. (Table 6)
 - ✓ Abstinence from alcohol and illegal drugs increased from 26.3% to 50% six months after intake. (Table 6)
- ▶ The overall six-month follow-up rate on February 19, 2015 was 55.7%, less than the 80% requirement.
